

# InTTrust Enterprise Collaboration Platform

## Highlights

InTTrust is building custom Intranet/Extranet Portal solutions with extensive customization in the areas of search, custom forms, workflow and connectivity with other data sources. The InTTrust solution is very popular in the banking sector, retail and manufacturing across various segments.

The Enterprise Collaboration Platform solutions deliver a "point of Integration" for content and collaboration, providing a single point of entry or access to existing applications, with personalization and single sign on capabilities.

## Collaboration Platform for the enterprise

InTTrust provides portal solutions to help organizations to improve their operational efficiency and productivity, as well as to accelerate application and content deployment. Using IBM WebSphere Portal, InTTrust provides organizations with personalized access to the right content and applications to simplify business processes and help enhance productivity and reduce costs across the enterprise.

InTTrust consultants can implement your Portal solution in a phased approach, so that you can quickly capture the value of the solution. They can assist you to identify your business needs and deploy the appropriate portal solution.

InTTrust is committed to lay the path for success by utilizing best practices and proven methodologies - with emphasis on minimizing disruption to workflow and IT infrastructure. This includes determining the most efficient infrastructure architecture and the appropriate security scheme for intranet/extranet deployment.
