

Windows Virtual Desktop on Azure

Our solution focuses on business **continuity** and secure **teleworking** when a breakdown occurs.

What is Windows Virtual Desktop?

It is an infrastructure solution built on Azure for working securely from everywhere using any device. The design and the implementation is **customer tailored**.

Windows Virtual Desktop on Azure

At a glance:

- Office mobility
- Minimum Cost
- Deployment and Scalability
- End-user experience quality

Office Mobility

- Data and applications are always available in hand as long as internet connection is available
- Data and applications are safe and protected against theft and accidental damage

Minimum Cost

- With eligible Windows or Microsoft 365 license there is no additional cost
- No additional cost applicable also to desktops powered by Windows Server Remote Desktop Services and apps

Deployment and Scalability

- Built-in security and compliance features
- Unified management in the Azure portal

Access your remote virtual desktop from any device: smartphones, tablets and, obviously, your PC at home

Pay only for Azure Virtual Machines and Azure Storage consumed

Deployment and scalability of Windows desktops and apps on Azure in minutes
