'We speak the language of Innovative Technology and translate your needs to Digital Transformation solutions'

It is part of InTTrust's capabilities to provide Application services that include Information Management, Application development, Engineering, Data and AI, Dynamic Infrastructure services to deploy and support customers' infrastructure onsite, on the Cloud or on Hybrid models, DBA services, Digital Transformation Solutions, Custom Applications Development, Multi-Cloud Integration, Cloud Governance & Security, IoT and ML/AI solutions.

Gold
Microsoft Partner

Digital Transformation: Boost productivity and efficiency with technology innovation tools.

THE NEED

The customer's need was to increase the efficiency and productivity between various teams. The automation of various time consuming processes, the provision of tools to the first workers and a 360 point of view concerning their business data were sufficient enough to achieve the desired results.

SOLUTION DESCRIPTION

- MS Power App platform
- MS Power Automate
- MS SharePoint (on Premise)
- MS SharePoint Online
- MS SQL Database on Azure
- MS Power BI

THE BENEFITS

- Power apps solutions provided the organization the tools to be more efficient.
- Power Bi achieved the desired 360 point of view by creating rich user experience reporting from consolidation of many sources.
- Power platform enhanced the collaboration between teams and achieved increased efficiency.
- Power apps provided the needed tools to first line workers to be more productive.
