

## DIGITAL TRANSFORMATION

Boost productivity and efficiency with technology innovation tools.

### About InTTrust

InTTrust was founded in 2006 as an IT Consulting, Technology and Digital solutions provider. During these 15 years, InTTrust has built a significant track record of Implementation and Support services, IT Managed Services, Cloud Infrastructure Managed Services, MSaaS (Monitoring and Support as a Service), BaaS (Backup as a Service), DSaaS (Databases Services as a Service), SAPaaS (SAP as a Service) Design and Implementation of Private/Public/Hybrid Cloud services.

*'We make advanced IT solutions simple & deliver what we promise'*

It is part of InTTrust's capabilities to provide Application services that include Information Management, Application Development, Engineering, Data and AI, Dynamic Infrastructure services to deploy and support customers' infrastructure onsite, on the Cloud or on Hybrid models, DBA services, Digital Transformation Solutions, Custom Applications Development, Multi-Cloud Integration, Cloud Governance & Security, IoT and ML/AI solutions.

### THE NEED

The customer's need was to increase the efficiency and productivity between various teams. The automation of various time-consuming processes, the provision of tools to the first workers and a 360 point of view concerning their business data were sufficient enough to achieve the desired results.

### MICROSOFT SOLUTION DESCRIPTION

- Power App platform
- Power Automate
- SharePoint (on Premise)
- SharePoint Online
- SQL Database on Azure
- Power BI

### THE BENEFITS

- Power apps solutions provided the organization with the tools to be more efficient
- Power Bi achieved the desired 360 point of view by creating a rich user experience reporting from the consolidation of many sources
- The power platform enhanced the collaboration between teams and achieved increased efficiency
- Power apps provided the needed tools for first-line workers to be more productive
