

- **From Vision to Value**
A Trusted Path with InTTrust & Microsoft

Christos Papanikolaou

- Solutions Sales Lead,
InTTrust SA

InTTrust at a glance

Portfolio of Services

- Dynamic Infrastructure
- • Application Development
- Database Administration Services
- Managed Services

Microsoft Solutions Partner

- Modern Work
- Infrastructure (Azure)
- Data & AI (Azure)
- Digital & App Innovation (Azure)

Engineering **Excellence** at our core

170+ Engineers • **400+** ICT Certifications • **100+** Microsoft Certifications

Journey to the “Frontier” Firm

Phase 1

Human with assistant

Every employee has an AI assistant that helps them work better and faster

Phase 2

Human-agent teams

Agents join teams as “digital colleagues,” taking on specific tasks at human direction

Phase 3

Human-led, agent-operated

Humans set direction and agents execute business processes and workflows, checking in as needed

Are we ready to **scale AI**

to every **employee** and every **department**

Do we have the
right **skills**

Are we ready for
the **"agent boss"**
type of employee

Do we have the right
security & data
governance that can
follow up with AI
speed and **scale**

Do we have a
proven **ROI &**
Business case for a
change of this
magnitude

Not there yet

Focused action needed

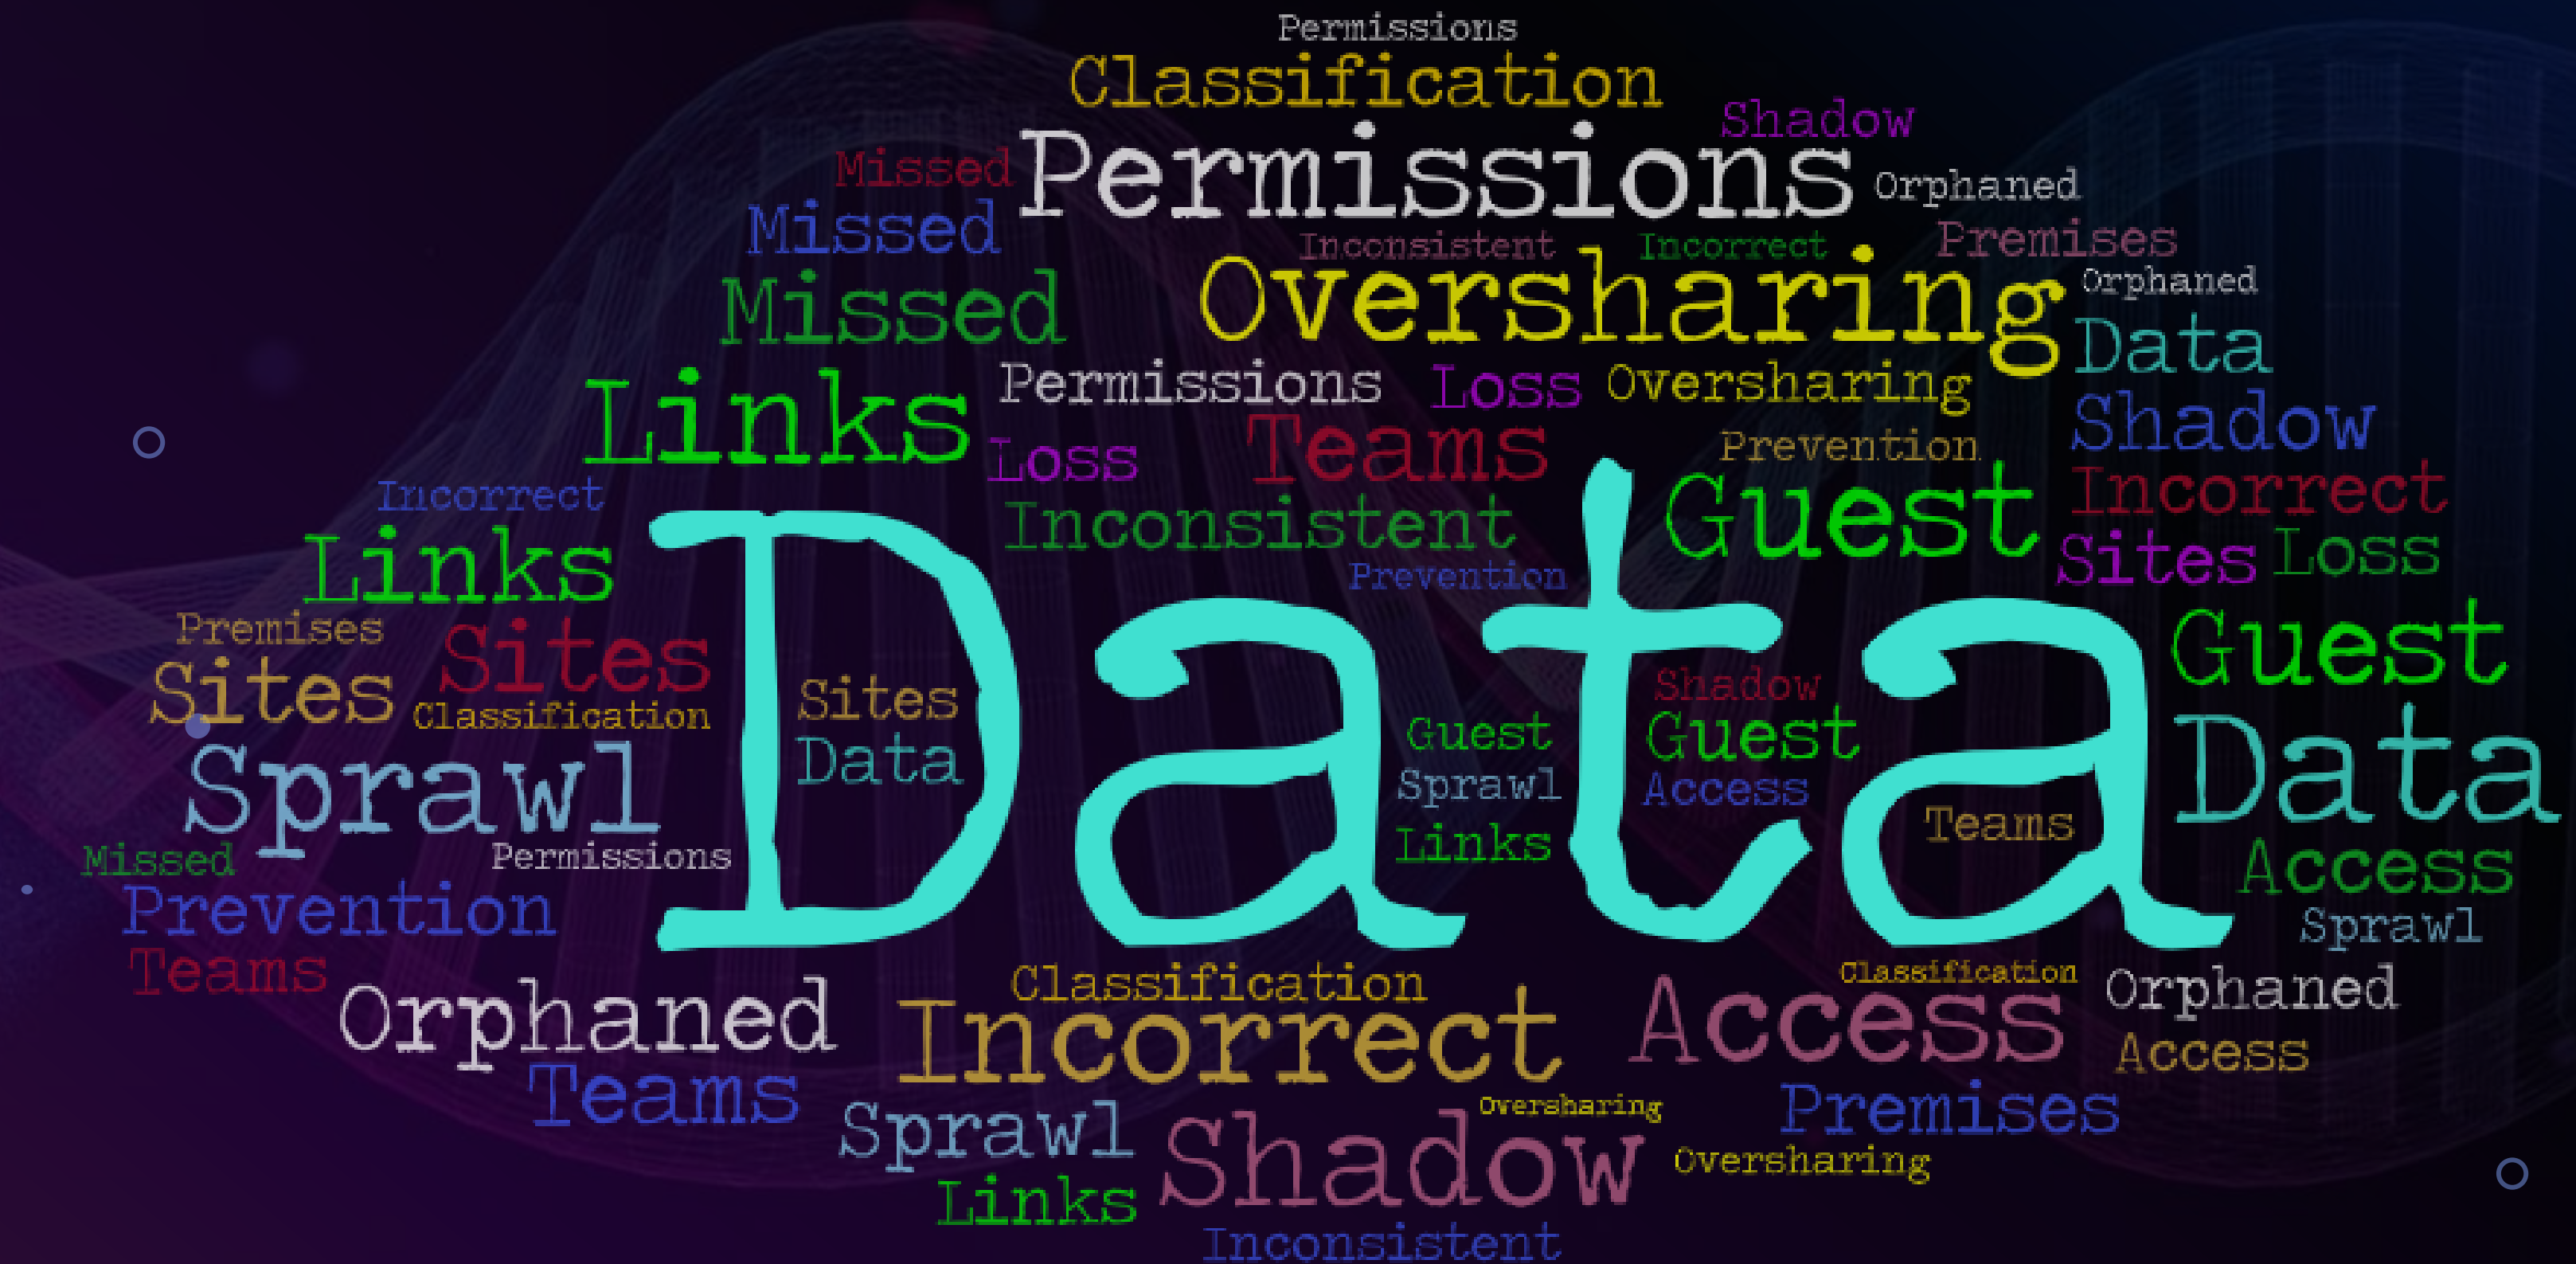

72% of organizations
on active pilot -
deploying

Only 17% committed
to org wide rollout

Security &
Governance is the
TOP barrier

Only 14% ready for
Agentic AI adoption
while 55% expect
benefit

ROI, lack of GenAI
skills and change
management are
also important
barriers

Data is the new oil

Where do we store
our data

(we have a File server)

Have we done enough
to secure, classify and
govern our data

(we have a written policy
about Confidential data)

Who has access to which
information and why?

(we found a guest that still has access
two years after project closure)

Microsoft Purview

The backbone of your AI Governance efforts

Data Security

Secure data across its lifecycle

- Data Loss Prevention
- Insider Risk Management
- Information Protection

Data Governance

Responsibly unlock value creation from data

- Data Discovery
- Data Quality
- Data Curation
- Data Estate Insights

Data Compliance

Manage critical risks and regulatory requirements

- Compliance Manager
- eDiscovery and Audit
- Communication Compliance
- Data Lifecycle Management
- Records Management

Unstructured & Structured data

Traditional and AI generated data

Microsoft 365, Azure, Fabric, 3rd party

Shared capabilities

Data Map, Data Classification, Data Labels, Audit, Data Connectors

SharePoint Advanced Management

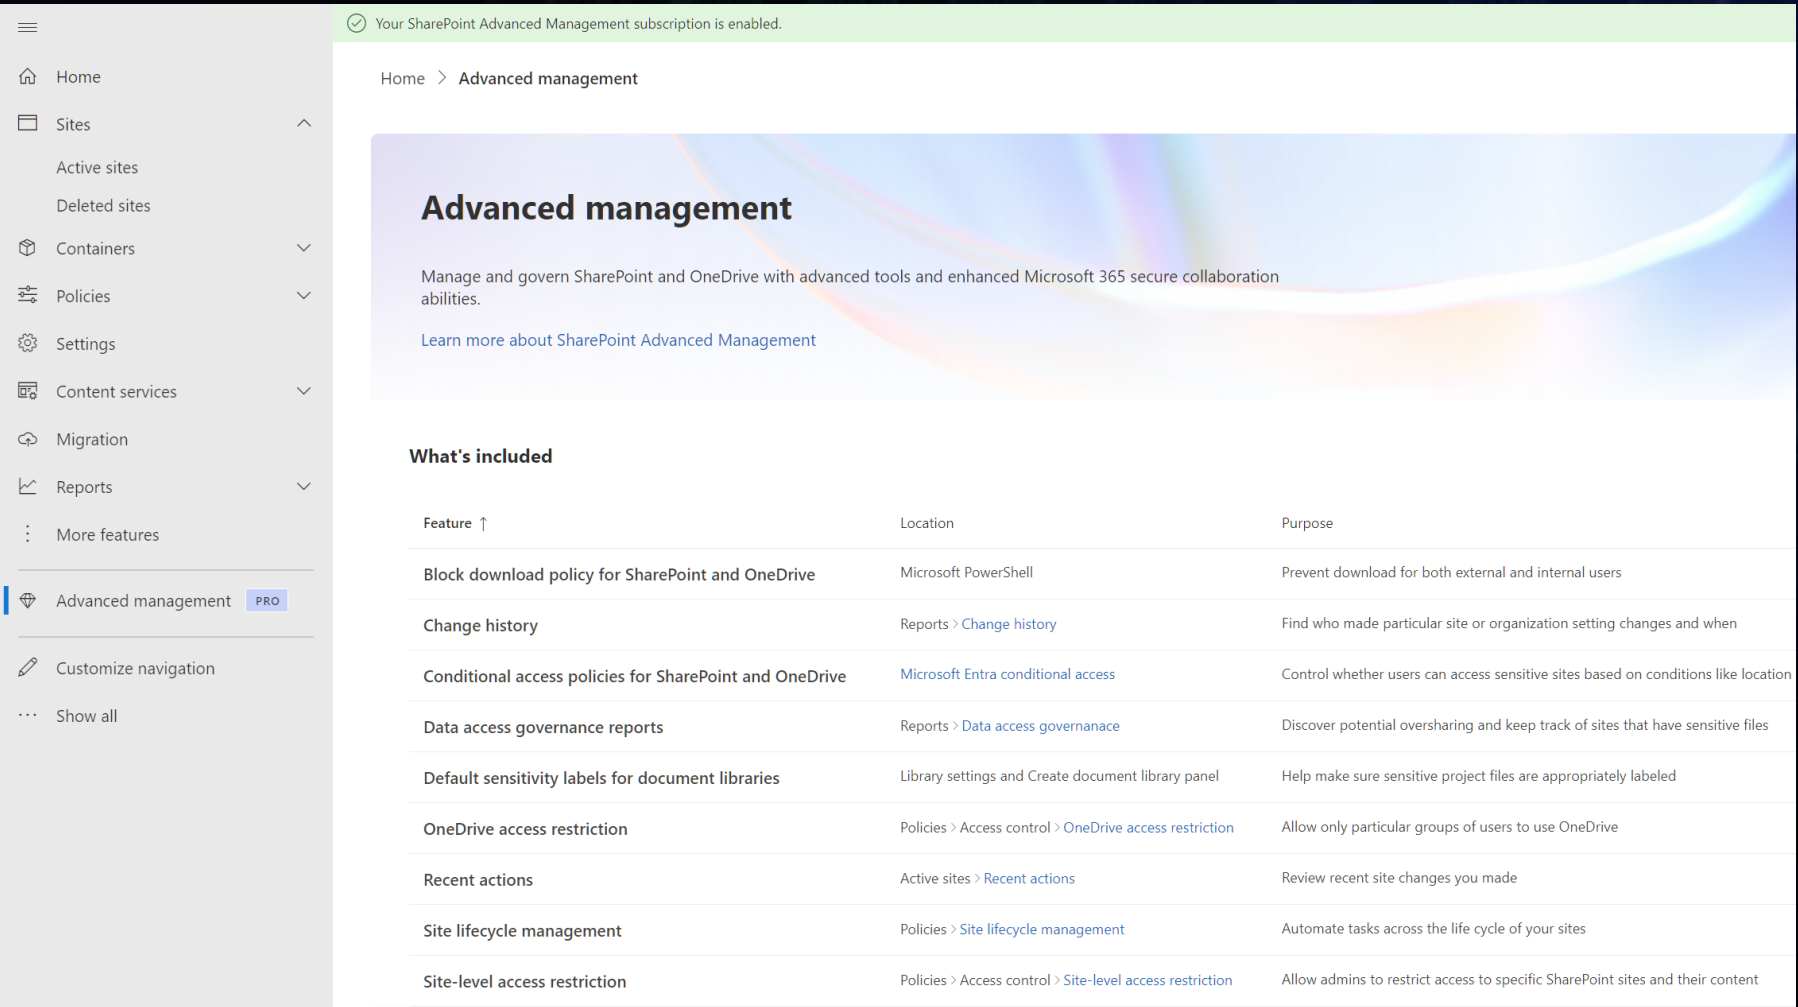

Free Add on for M365 Copilot customers

A good starting point to have an initial view of risks before deploying even in pilot mode

IT and manual work driven – PowerShell needed for certain tasks, various caveats - excel data handling and manual effort for remediations

Free and good if your goal is to have an initial “snapshot view” of where you stand in terms of risks

Most important (conceptual) limitation: It is not designed to solve the Microsoft 365 Governance pain points holistically and in the long run

Governance is a continuous process not a one time “audit”

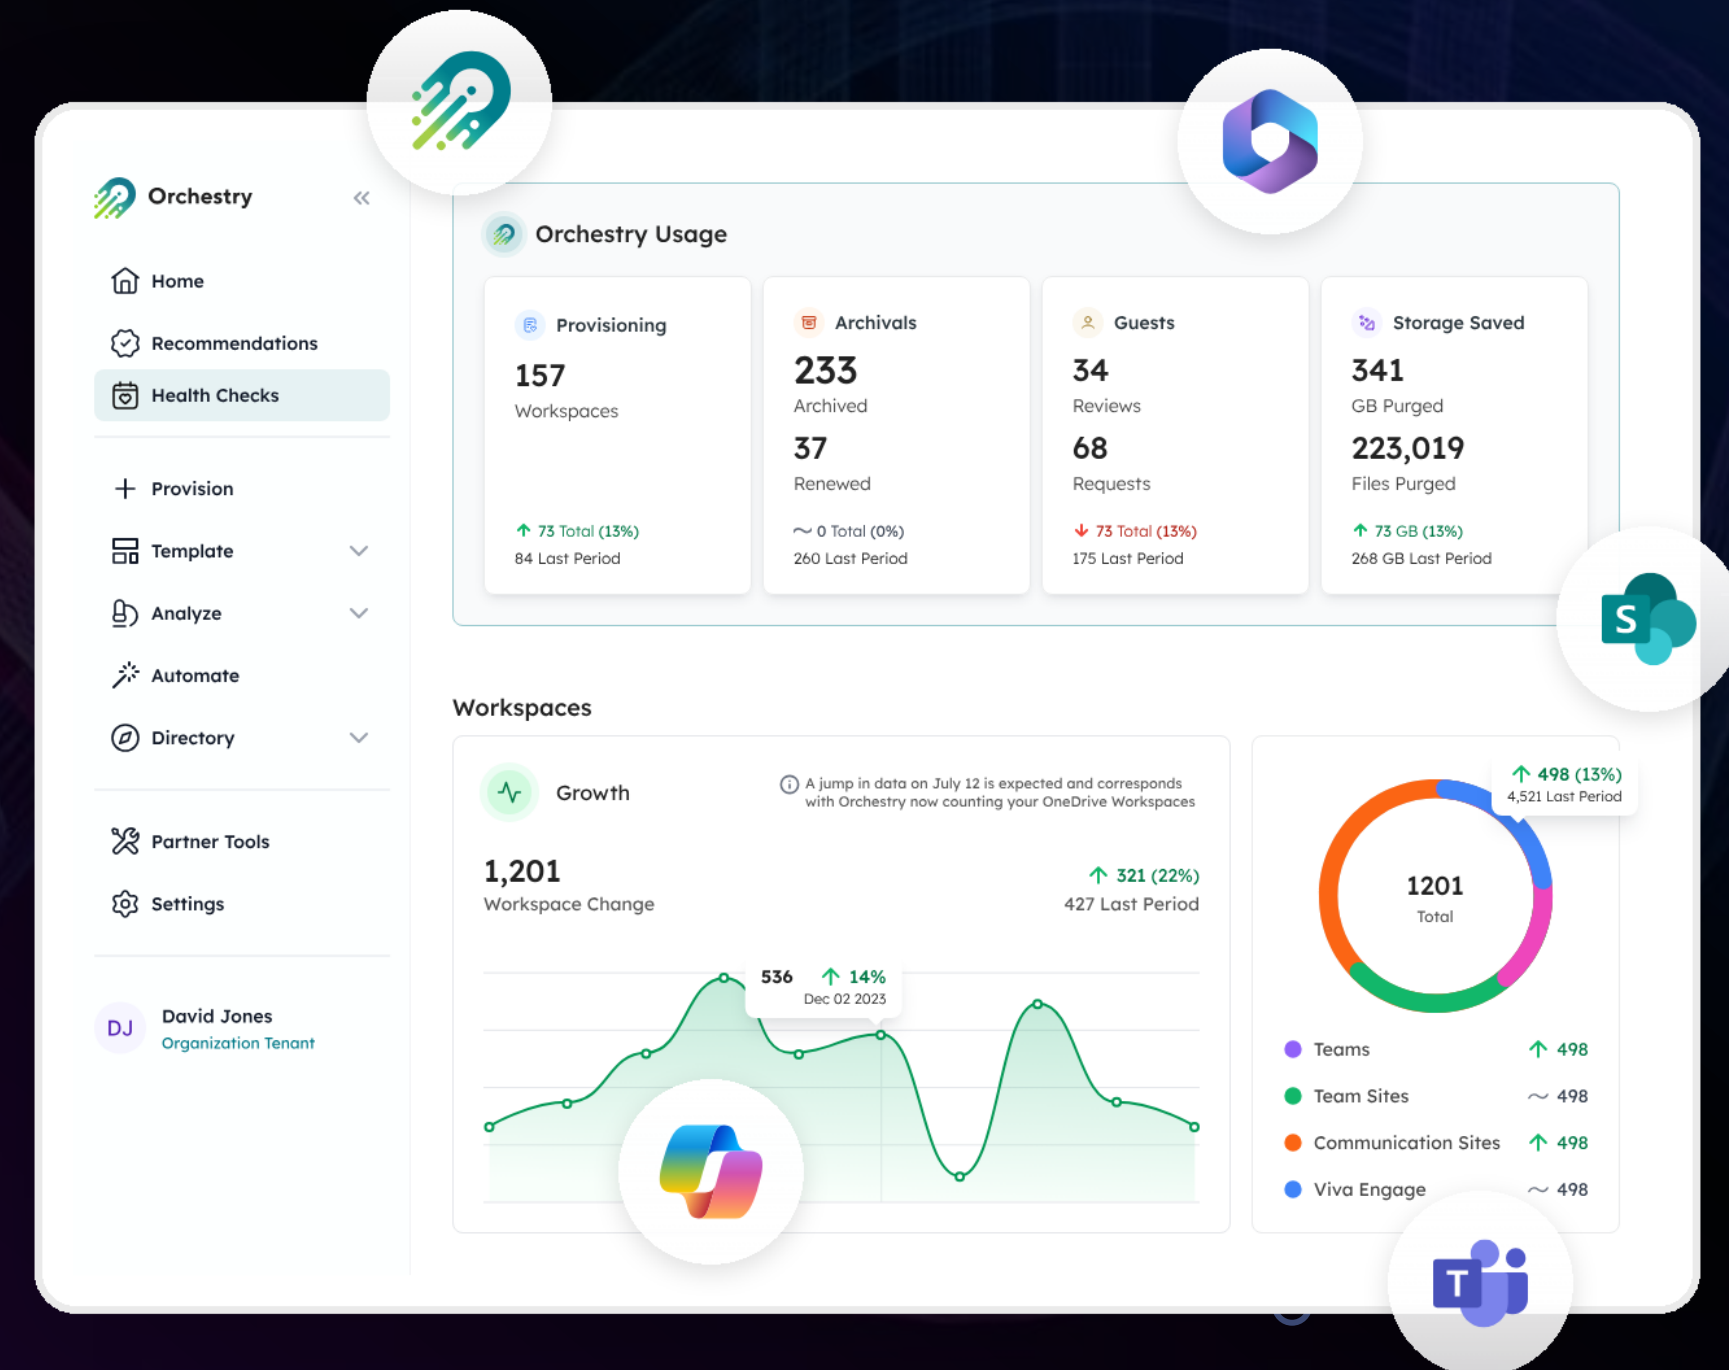

A Microsoft 365 Governance solution build by Microsoft 365 MVPs addressing real & known pain points

Established InTTrust – Orchestry Partnership

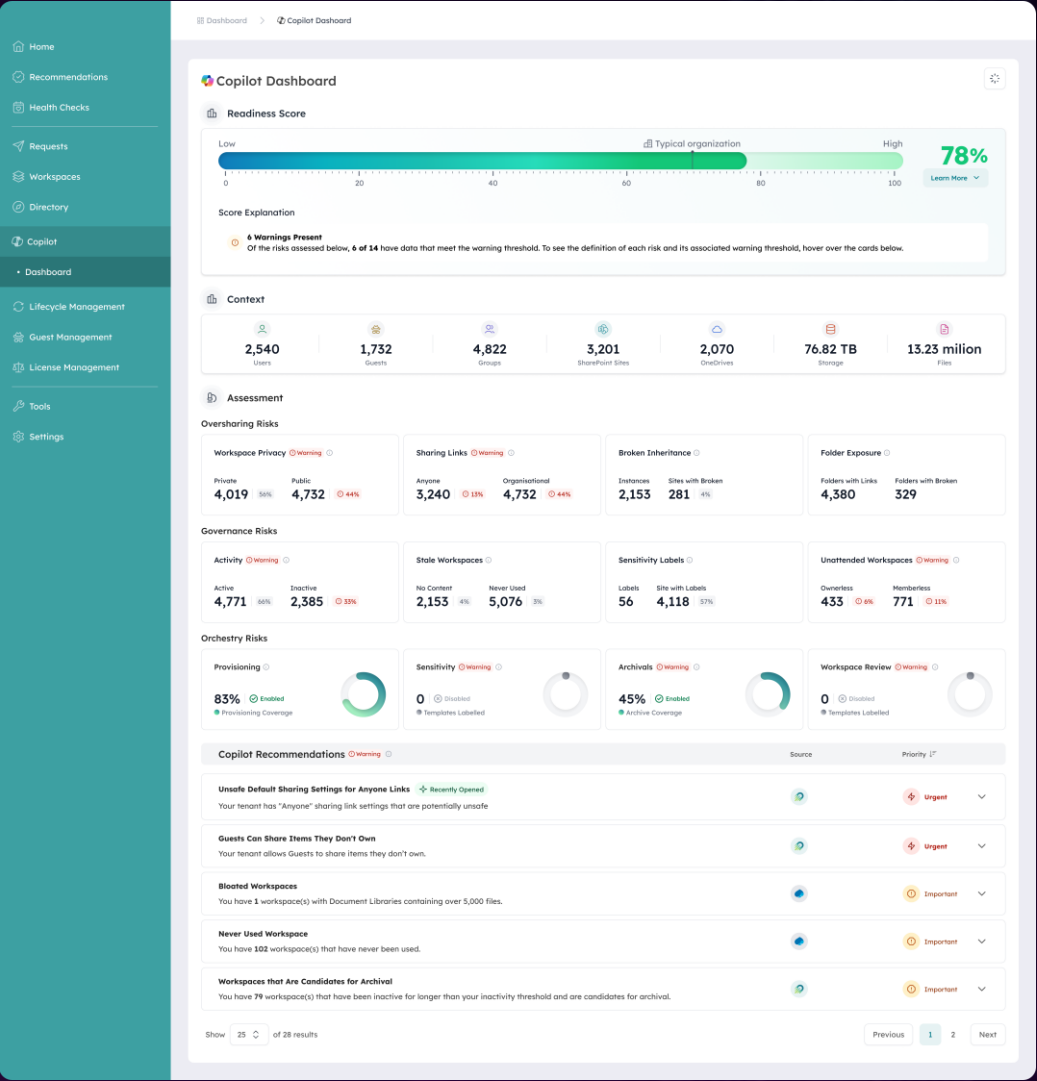

Microsoft 365 Governance simplified and automated

Microsoft 365 Copilot Dashboard: Readiness assessment based on your actual data (no questionnaires / guessing)

Why: Diagnose & fix is not good enough – maintain and optimize your Microsoft digital workplace landscape for the AI era at scale

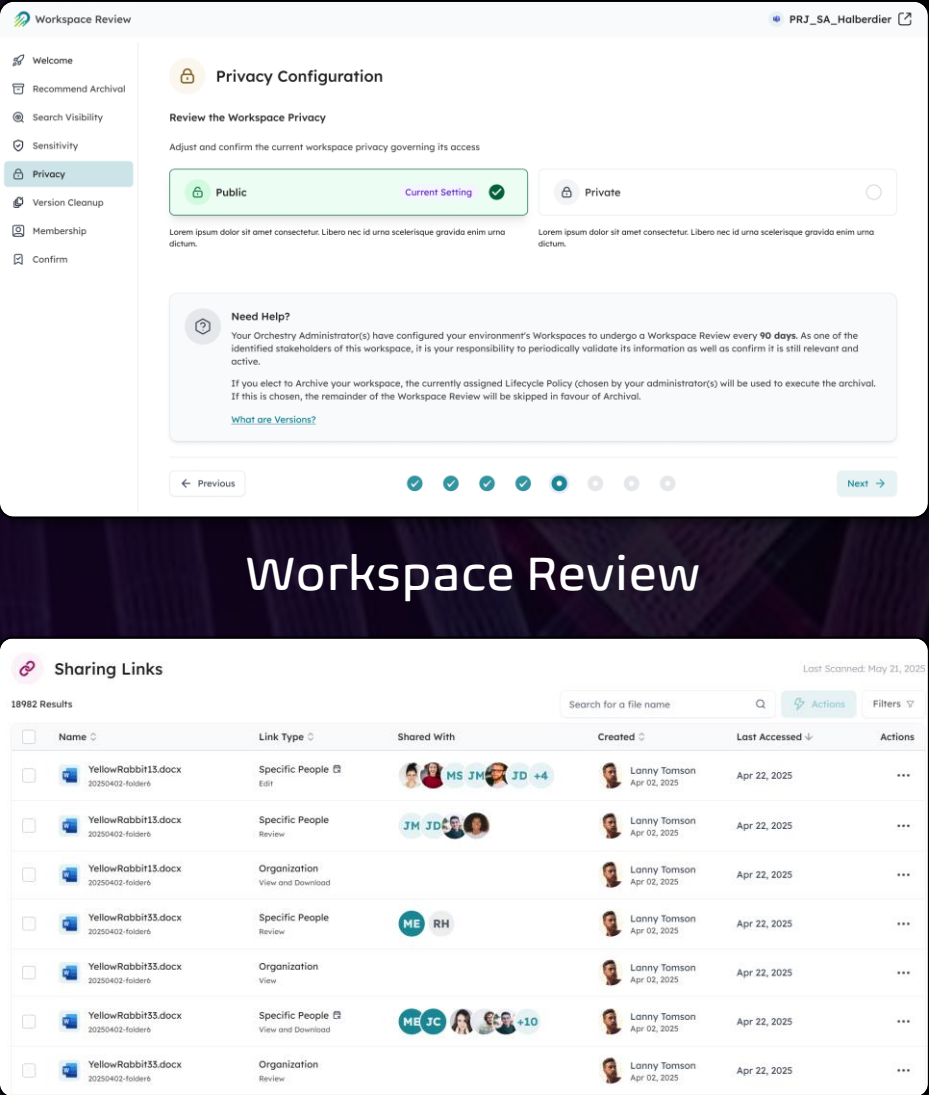

Diagnose

Microsoft 365 Copilot Dashboard
(Readiness)

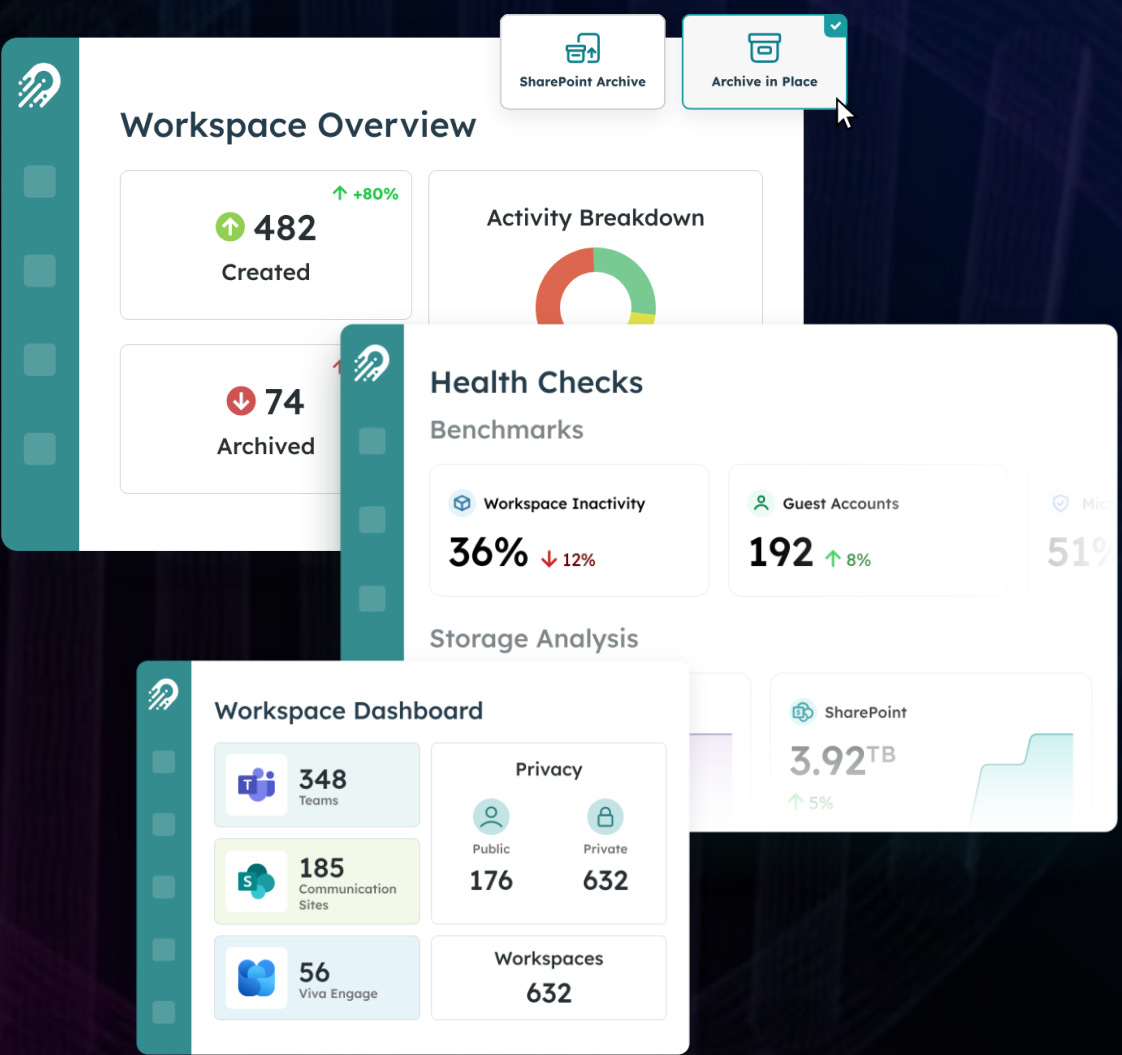

Fix

Workspace Review

Sharing Links Reporting

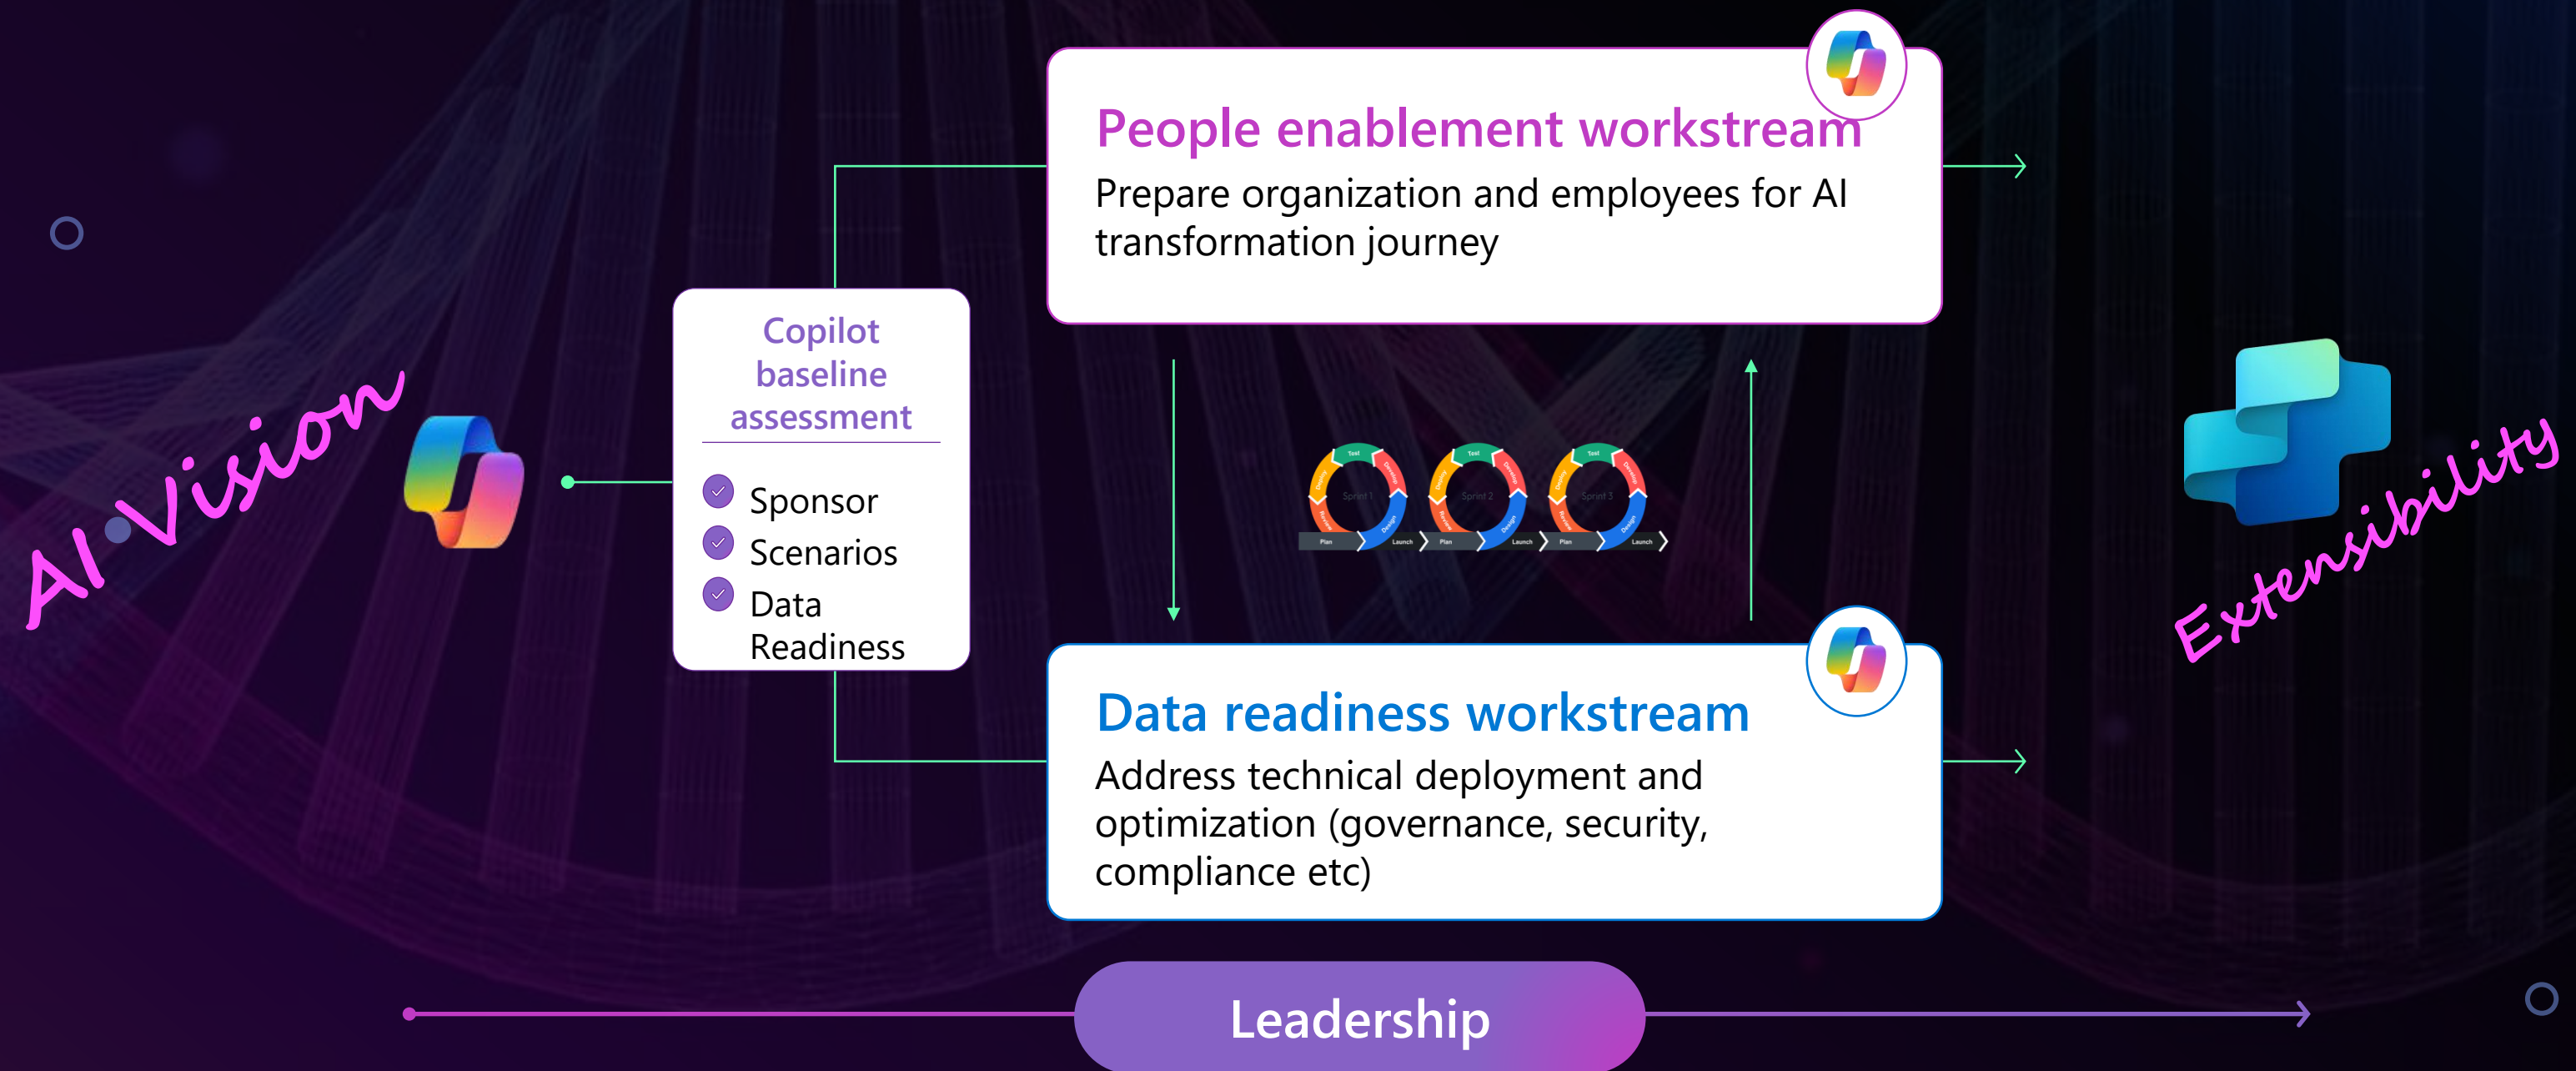

Maintain

Policy based Workspace Lifecycle
Management
(from provisioning to archive / deletion)

How can InTTrust help from A to Z

A trusted roadmap to scale your AI efforts

How can InTTrust help from A to Z

Full range of Services from ACM to Extensibility

Adoption & Change Management

Copilot Value Discovery: Role based workshops targeted to specific functions (Legal, Procurement, HR, Sales)

Employee Communications (Planning for AI rollout)

Champions Program & Usage Analytics (measure AI adoption)

Data Governance at Scale for AI

Purview rollout (DLP & Information Protection) – extend to Insider Risk Management etc

Setup DSPM for AI hub

Microsoft 365 Copilot Readiness & Governance via Orchestry

Extend to Agentic AI

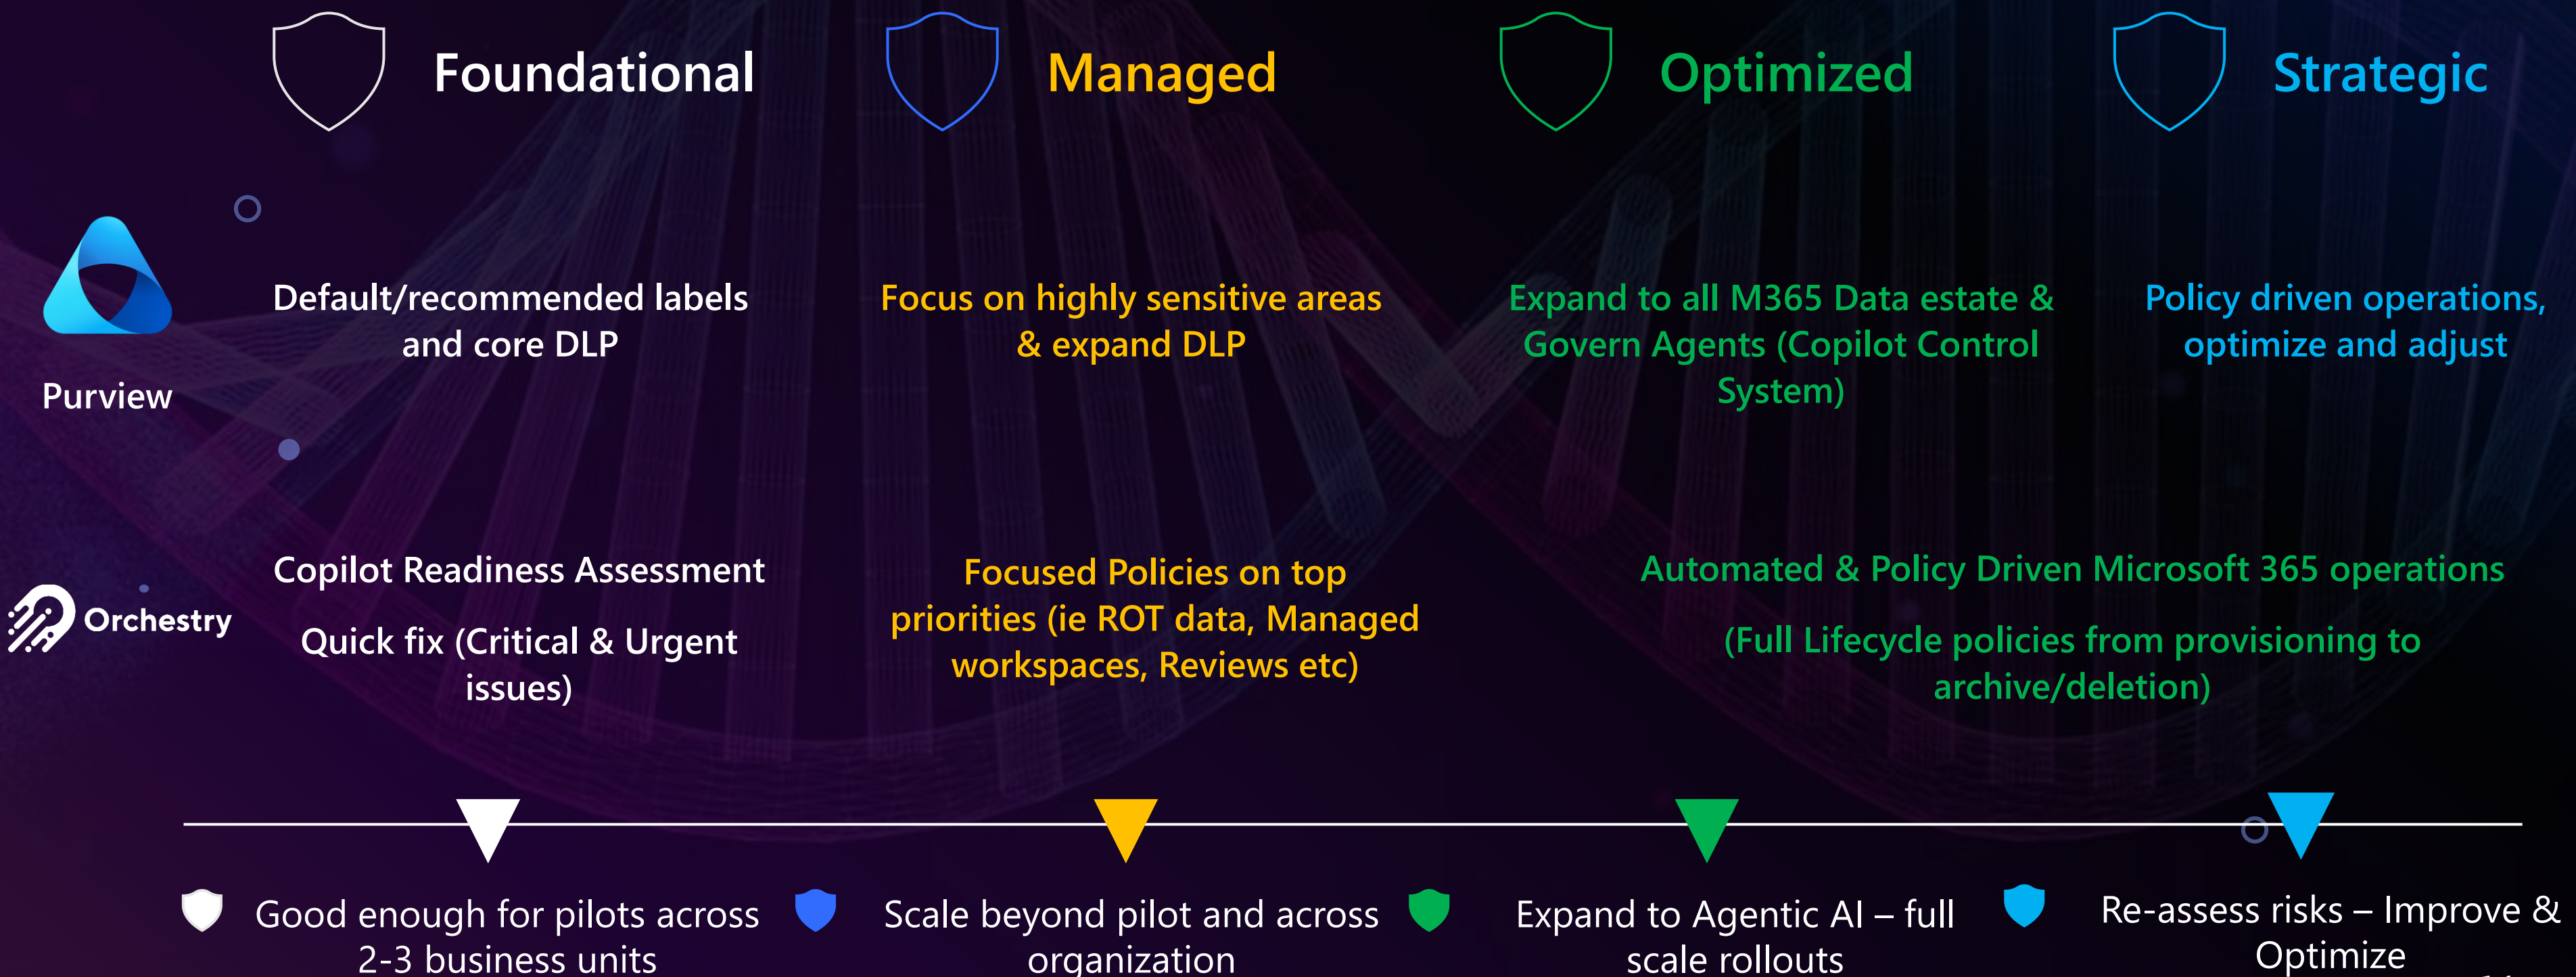

Copilot Studio Agent Ideation, Design and Implementation

Copilot Control System: Agentic AI Governance Framework

Graph Connectors & Secure Data Source Integration

How can InTTrust help from A to Z

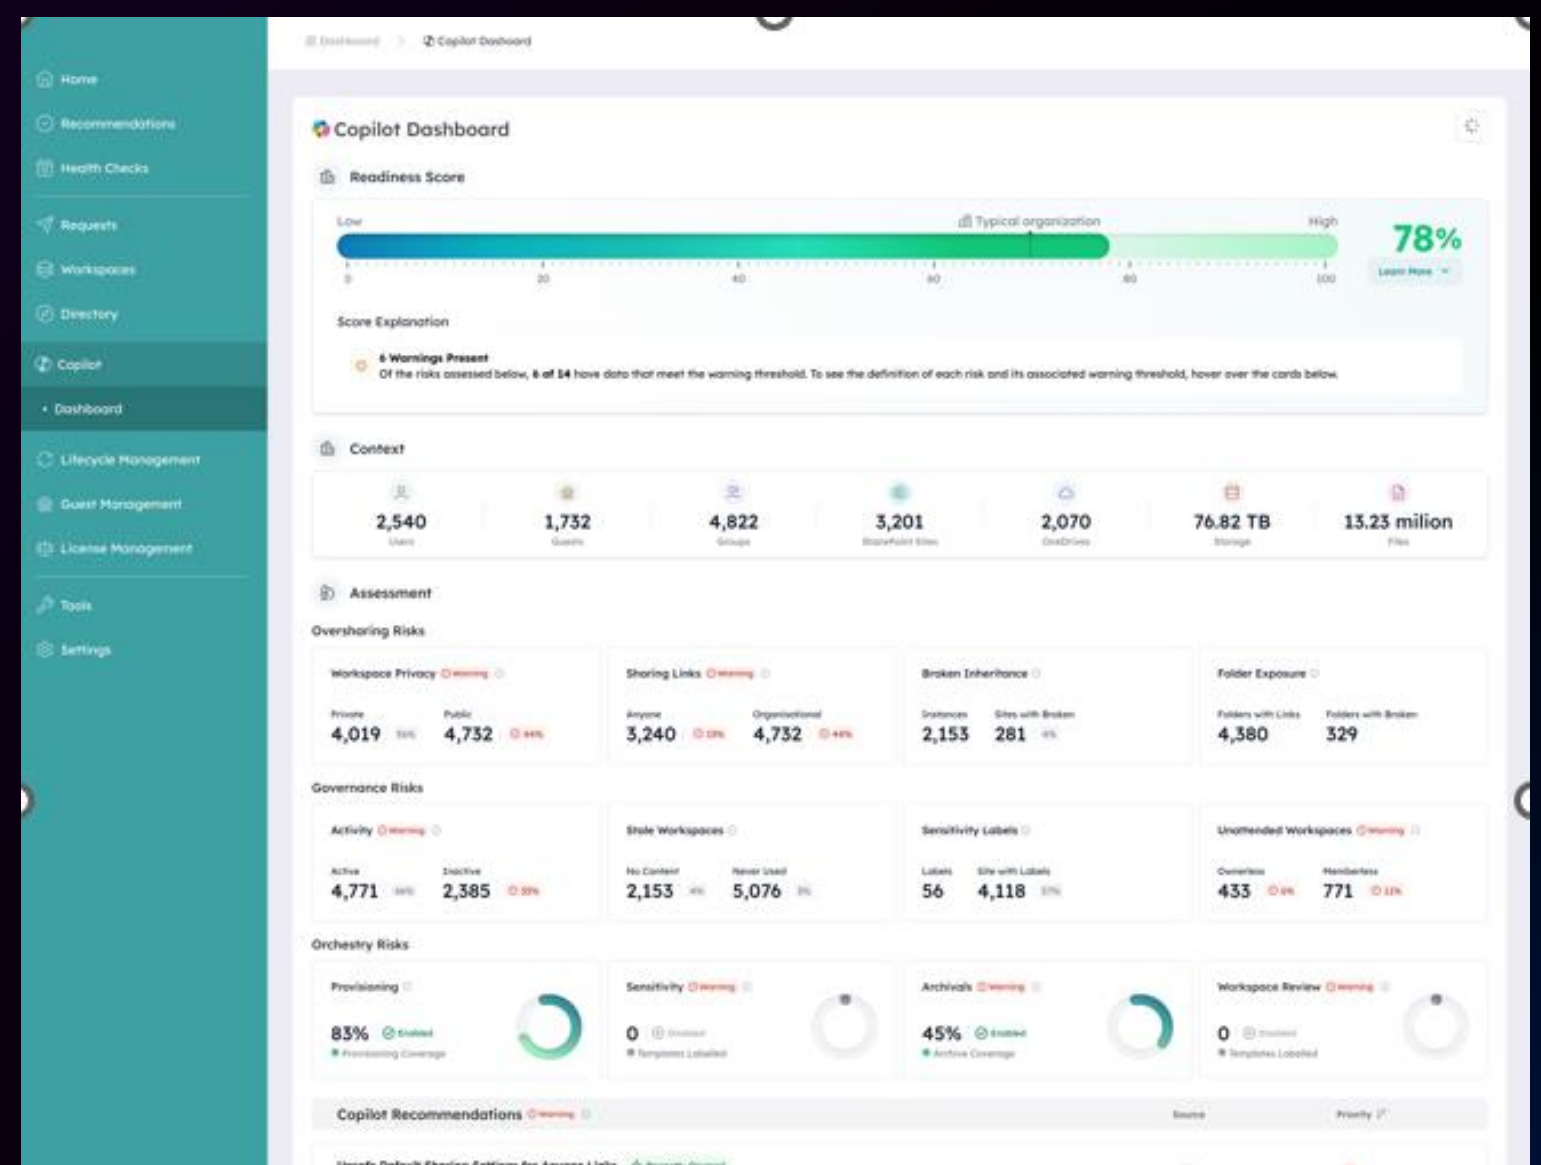

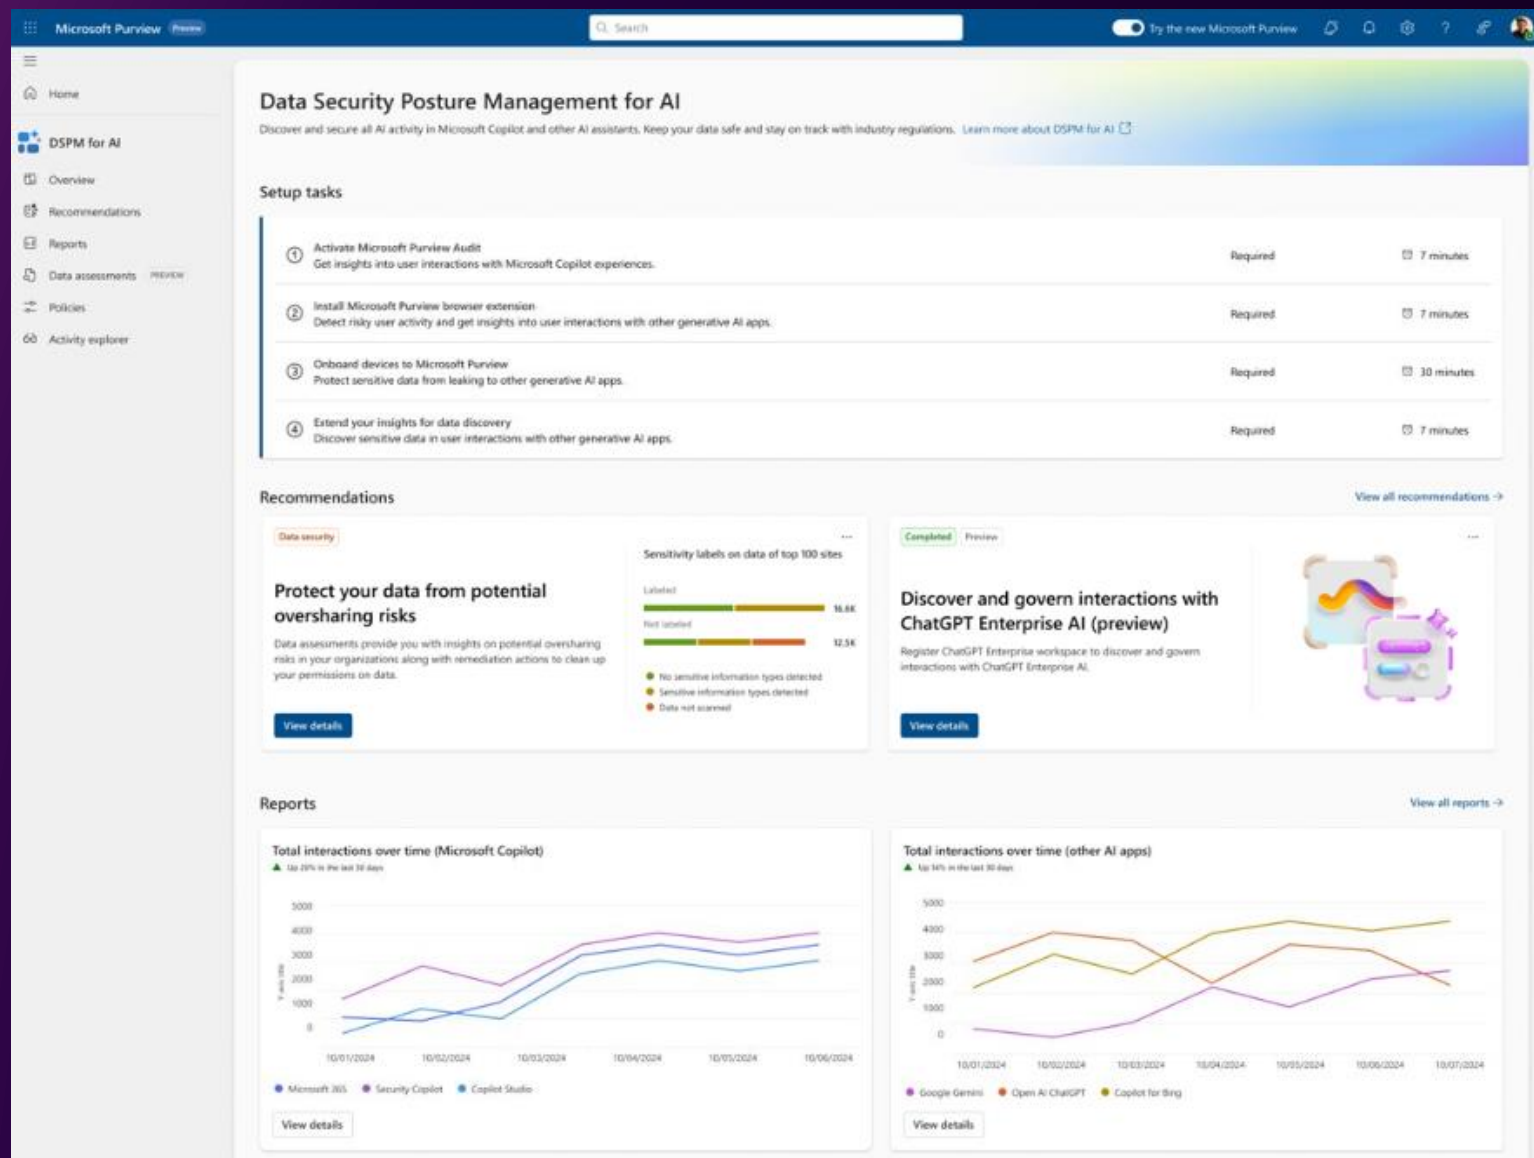

Pillar: Data Governance at Scale for AI

Your Data Governance cockpits for AI at scale

Microsoft Purview DSPM for AI

Orchestry for M365 Governance

Thank you
